Fusion UDM Premium

vxl software

Key Features

Scalability

Ten devices? Fine. Ten Thousand? No problem. More? Fusion UDM Premium can handle it with ease.

Discoverability

With agentless discovery alongside industry-standard discovery techniques, Fusion UDM Premium can quickly locate any and every compatible device on the network.

Device Management

Fusion UDM Premium provides outstanding management of all static and mobile endpoints on a near-to real-time basis.

Task Management

Simple and complex tasks can be defined, scheduled and then deployed across the network to selected or all endpoints with ease.

Patch Management

Make light work of regular software and operating system updates across all network devices with Fusion UDM Premium's workflow assisted patch management.

Asset Management

Dashboards provide a complete picture of both hardware and software for total visibility of all assets. A comprehensive asset reporting module allows you to communicate data to the management team.

Power Management

Fusion UDM Premium manages power consumption proactively by controlling usage and saving costs.

Comprehensive Reporting

Dashboards and an extensive set of reports provide detailed insight into every aspect of your IT infrastructure for up-to-the minute reporting.

Compliance

Fusion UDM Premium keeps you within the law as well as ensuring you only buy the licences you actually need.

Security

A range of innovative add-ons deliver high-level security to keep your organisation safe from potentially harmful and costly breaches.

Remote Control

This comes as standard and provides central control, no matter your location, with complete access as and when it's needed.

Powerful universal device management software

Fusion UDM Premium is VXL Software's powerful, cost-effective universal device manager.

While it's easy to use, it stands shoulder to shoulder with mainstream device managers - and has a few additional features of its own.

vxl software

Device Management For Everyone

DISCOVERABILITY

Fusion UDM Premium can find devices quickly and easily, via a range of methods, including agentless discovery, DNS name, DHCP Scope Option and more.

DEVICE MANAGEMENT

Fusion UDM Premium's comprehensive device configuration and management capabilities deliver an outstanding level of control on a near-to or real-time basis.

ASSET MANAGEMENT

The asset management dashboard provides administrators with a complete picture – hardware and software – right across the organization. No more guesswork. No complex asset databases. Complete tracking and trouble-free compliance.

PATCH MANAGMENT

Software and operating system updates are vital for security but they come along with tedious regularity. Fusion UDM Premium lets you roll out updates painlessly, across all devices, with ease.

COMPLIANCE

Helps you ensure legal software compliance by ensuring that all your software is audited. The built-in license metering suite ensures that you only buy the licenses you need and do not use more than you own.

SECURITY

Fusion UDM Premium is available with a range of security add-ons. These include the ability to create secure, encrypted zones on PCs/laptops, and stopping company USB devices being used outside the organization.

POWER MANAGEMENT

For many organizations, their most significant IT cost is power. Fusion UDM Premium enables organizations to manage their power consumption proactively – for example, by shutting down devices (or putting them into standby) when not needed – and then waking them ready for use.

24/7 MONITORING

Keep an ever-watchful eye on an organization's hardware and software and make sure everything is operating just as it should. Fusion UDM Premium can predict failures, reduce downtime and ensures a rapid response should something fail.

MOBILE DEVICE MANAGEMENT

Today's workforce has to be mobile, so your device management has to be mobile too. Fusion UDM Premium is designed from the ground up to support mobile devices, including phones and tablets running Windows*, iOS* and Android.

REPORTING

Information is everything, and Fusion UDM Premium provides it in detail. Always easy to access, dashboards provide a detailed insight into every aspect of your infrastructure. Comprehensive reports can be accessed as needed – and exported to Excel or PDF for analysis or presentation.

TASK MANAGEMENT

Send device configuration changes to devices using Fusion UDM Premium's highly flexible task management system.

REMOTE CONTROL

Remote control devices using either VNC or RDP. Our Remote MultiView shows a grid of controlled devices to allow control over (and switching between) several devices easily.
