

Digital Signage for the Transport sector

Keep travellers safe, informed and entertained with easy-to-use
Illumineye Digital Signage suite from VXL Software

Ideal for airports, train, bus or tram stations, our digital signage solution replaces static text and pictures with eye-catching displays, using video, moving images & scrolling text, for a more engaging viewer experience. Pre-prepared templates make organising media easy and scheduling software lets you choose the right time when different media is displayed.

With Illumineye digital signage you can quickly and easily display:

- Up-to-the-minute travel information
- Health and Safety and Security alerts
- News announcements
- Advertising, Live TV & Social Media feeds
- Wayfinding for travellers
- Embrace a greener communication policy
- Provide a low cost solution with high return on investment... and much more

Create, manage and display with Illumineye Digital Signage Suite

A complete digital software solution - combining feature-rich software & powerful media players.

- User-friendly solution with Creator & Manager software - no design experience needed.
- Powerful, dedicated media players to deliver stunning HD and 4k displays.
- Highly versatile inc. support for video, text, images, audio, tickers, live TV, social media.
- Full installation and support available
- Clear and simple pricing, a one-off perpetual licence payment, no annual subscription costs.
