

CloudDesktop On the Go®

Roaming Micro Thin Client

On the Go computing never looked like this!

Carry your thin client desktop with you wherever you roam

Whether you are hot-desking or wish to have a roaming thin client, CloudDesktop On the Go (COGO) is the perfect product for you. Equipped with our highly successful CloudDesktop operating system, the COGO USB pen drive allows you to simply insert and use your thin client at any USB bootable PC or Laptop and even a thin client, whether with storage or not. When done, just shutdown, remove the COGO USB and you're away!

COGO is an extremely attractive proposition, providing a perfect alternative to replacing your investment in legacy PCs. COGO provides a perfect and fluid platform to provision your fat clients to thin clients - by utilizing existing hardware by empowering it with the highly secure, centrally managed CloudDesktop OS.

As more organizations move to a virtualized world, they face the problem of replacing legacy PCs with thin clients and zero clients. Because COGO requires very modest RAM to run virtual applications, both new and old PCs can be used as donor platforms, delivering thin client devices at a fraction of the cost of buying new thin clients.

COGO is a hybrid solution which delivers all of the benefits that you'd expect from a thin client, including enhanced security, outstanding control, zero viruses - and more.

Available in English, French, German and Spanish languages, COGO is designed to work in harmony with Microsoft, Citrix, VMware and other protocols. A versatile USB Device Manager allows granular control of which USB devices can be used, while other security functions such as kiosk and super-kiosk mode secure your working environment. COGO gives you everything you need to go from machine to machine, and location to location carrying your thin client with you.

WHY YOU SHOULD BUY THE LENOVO CLOUDDESKTOP ON THE GO

Extends PC lifespan

Dramatically extends the life of your legacy PC, creating the perfect stepping stone to thin client computing.

Instant roaming

With CloudDesktop On the Go, you can easily hop from location to location taking your thin client with you. Your desktop and settings travel with you.

Boosts productivity

Using an embedded & hardened Linux operating system, CloudDesktop boosts your user's productivity by focussing users.

Secure and stable

CloudDesktop has been designed to be secure, using a hardened Linux framework, making it perfect for corporate and financial environments.

Highly flexible

Equipped with the latest thin connectivity client software, CloudDesktop will connect to almost any server framework including Citrix®, VMware® and Microsoft®.

Enterprise management available

CloudDesktop is manageable using LTM, included within the cost. LTM delivers enterprise grade features and quality.

LENOVO CLOUDDESKTOP ON THE GO IS BEST SUITED FOR

1 | Businesses with an existing, legacy PC infrastructure and wish to utilize their investment to the maximum

2 | Businesses that are looking for a transition technology that is secure, simple and flexible in its approach.

3 | Users that require hot desk or roaming support and wish to take their thin clients with them.

CloudDesktop On the Go®

SPECIFICATIONS

- Crontab - execute pre-defined tasks at a particular time and/or interval
- Digital Certificate Manager
- ADS, LDAP and local user authentication
- Single sign-on support
- Appliance mode - use only assigned protocols

and/or applications

- Modular user access control - restrict usage of advanced functionality by user
- Restore factory settings, without disturbing connection-related configurations
- Services - CUPS, LPD, SAMBA, FCron, SNMPd, VNC
- CUPS, SMB, IPP, LPD and JetDirect printing with PrintQueue management - devices can also act as print servers using the JetDirect mechanism
- Fail-over, multi-session and ending option for connections
- Custom partitioning option to utilize unused storage
- Custom scripts and environment variables
- Support for locally attached USB scanners
- Run limited Windows applications, using Wine
- JavaWebStart and JavaNetworkLaunchProtocol support
- Tool for recording, saving and playback of audio and video
- Tightly managed by LTM included with CloudDesktop On the Go

RECOMMENDED SERVICES

EXTENDED TECHNICAL SUPPORT AND MAINTENANCE

CloudDesktop On the Go is provided in conjunction with our technical support starter package that provides you with support and maintenance up until the first product purchase anniversary.

You are advised to purchase an additional extension to three years when purchasing CloudDesktop On the Go - you can defer this until later should you choose to do so, although early purchase avoids any break from support or updates.

LICENSING

Simplified licensing ensures that you can bring your CloudDesktop On the Go installation on-stream as quickly as possible.

HOW IS CLOUDDESKTOP ON THE GO LICENSED?

The CloudDesktop On the Go license is included within, and linked to the COGO USB.

LTM LICENSING FOR CLOUDDESKTOP

LTM can control all CloudDesktop and COGO installations, and a perpetual license is included with the first year's support and maintenance. Support and maintenance for additional years is available from Lenovo at a very affordable cost.

The licenses can be activated automatically via the Internet or via email.
